

SHUBHAM BHAGDE

Senior QA Engineer | Healthcare & Gaming QA | Compliance Testing

Nagpur, India | +91 9096600621 | shubham.bhagde@gmail.com

PROFESSIONAL SUMMARY

QA Engineer with 6+ years of experience across healthcare EHR compliance and consumer gaming. Currently specializing in healthcare, with expertise in HIPAA, ONC, CURES Act/HTI-1, and MIPS-PI compliance testing, backed by a record of zero-critical-finding audits. Gaming QA background adds versatility in UI/UX, compatibility, and performance testing. Building hands-on Playwright automation skills alongside strong manual testing expertise.

CAREER HIGHLIGHTS

- 1,000+ manual test cases executed across EHR scheduling, billing, clinical documentation, and patient portal modules.
- Zero critical findings across ONC Health IT certification and HIPAA compliance audits.
- 250+ pre-release critical defects identified in PC/mobile game testing, reducing post-launch defect rates.
- Designed reusable Quick Regression Test (QRT) suites, cutting regression cycle time while preserving coverage.

TECHNICAL SKILLS

Testing Types: Manual, Regression, Functional, Smoke, Sanity, Integration, Exploratory, Mobile App, UAT

Automation: Playwright (JavaScript) – currently building E2E test coverage; not yet at production-independent level

Test Management: Test Plan Creation, Test Case Design, Test Execution, Bug Lifecycle Management, Defect Tracking & Reporting, Traceability Matrix

Tools: JIRA, TestRail, Postman, SQL

Domains: Healthcare (EHR/EMR), Gaming, HIPAA, ONC, CURES Act, HTI-1, MIPS-PI, Real-World Testing (RWT)

Methodologies: Agile/Scrum, SDLC, STLC

WORK EXPERIENCE

Executive QA Engineer | Bizmatics India Pvt. Ltd.

April 2022 – Present

- Executed 1,000+ manual test cases across EHR modules including scheduling, billing, clinical documentation, and patient portal, ensuring compliance with HIPAA and ONC certification standards.
- Led end-to-end compliance documentation and QA activities for ONC Health IT certification, CURES Act (HTI-1), and Real-World Testing (RWT) programs, contributing to audits with zero critical findings.
- Collaborated cross-functionally with developers, product analysts, and compliance stakeholders in Agile/Scrum sprint cycles, ensuring timely defect resolution.
- Maintained detailed test artifacts, traceability matrices, and audit-ready documentation for regulatory submissions including MIPS-PI reporting.
- Communicated test results, defect summaries, and release readiness reports to stakeholders, enabling informed release decisions.
- Building automated test scripts using Playwright (JavaScript) to extend regression coverage across patient scheduling, clinical documentation, and billing workflows, aiming to reduce manual effort over time.
- Currently testing the AI Scribe feature within the EMR product, validating that AI-captured clinical conversation details are accurately extracted and placed into the correct EMR sections.

Senior Test Engineer | GlobalStep India Pvt. Ltd.

January 2019 – April 2022

- Designed and executed Quick Regression Test (QRT) suites to validate release stability and minimize regression risk across sprint-based releases.

- Conducted comprehensive manual testing for PC and mobile games, covering functional, UI/UX, compatibility, and performance scenarios.
- Identified and documented 250+ critical defects prior to product releases, directly improving game quality and end-user experience.
- Managed test cases, test runs, and test artifacts using TestRail; maintained organized, up-to-date repositories across multiple concurrent projects.
- Executed regression and smoke testing across build cycles to ensure release-ready software quality and feature stability.
- Participated actively in the Agile development lifecycle, contributing to sprint planning, daily standups, and retrospectives.
- Tracked and managed the defect lifecycle using JIRA, ensuring accurate priority assignment and timely closure of reported bugs.

PROJECTS

AI Scribe – EMR Product | *Bizmatics India Pvt. Ltd.*

- Working as QA on the AI Scribe feature, which listens to clinical conversations and auto-populates structured details into the correct EMR sections (e.g., history, assessment, plan).
- Validate accuracy of AI-extracted clinical data against source conversations to ensure correct section-mapping and prevent documentation errors that could affect patient records.
- Collaborate with product and engineering teams to define test scenarios covering varied clinical conversation patterns, edge cases, and terminology.

EDUCATION

Bachelor of Engineering – Electronics & Communication | Nagpur University | 2013 – 2016

Diploma – Electronics & Communication | MSBTE | 2009 – 2013

CERTIFICATIONS & TRAINING

- Postman API Testing – FreeCodeCamp
- SQL for Testers – Udemy
